

## Planar Environmental Policy

Last modified: June 2016

Planar strives to minimize the impact to our environment by designing energy-efficient products, integrating environmental stewardship best practices in our products and facilities, and providing end of life resource management for the benefit of our customers, shareholders, employees and corporate success.

Planar shall:

- Comply with all applicable environmental laws, regulations and standards and make every effort to meet our commitments to our voluntary programs.
- Establish reasonable objectives and targets with a goal of reducing Planar's impact on the environment both within the scope of product development and in Planar's facilities.
- With a goal of continuous improvement for our Environmental Program, develop a means to measure objectives and targets. Review, revise and report these measures, and overall program updates, on an annual basis.
- Encourage the proper reuse, recycling and disposition of our products and packaging during and at the end of their lifecycle.
- Empower all employees, suppliers, vendors and contractors to take ownership in the Environmental Program and to practice good environmental stewardship at work and in their communities.
- Effectively communicate to all employees this Environment Policy and our Environmental Program.
