

Upgrade instructions:

1. Download latest firmware and copy it to root directory of a USB drive
2. Power on device and plug USB keyboard to the device and wait for the menu to appear

IMPORTANT: If your device is password protected, plug in a USB keyboard, press "Ctrl+Alt+Delete" key combination to enter the menus

3. Select firmware upgrade option. Follow on screen instructions. It will notify user when to plug the USB with firmware to the device.
