Warranty and Service Plans
Planar warranty and service plans will help you maximize your investment by providing great support, display uptime, and performance optimization. From post-sale technical support to a full suite of depot services, our services are performed by trained Planar employees. When you purchase a Planar product, you get more than a display, you get the service and support you need to maximize your investment. To find the latest warranty and service information regarding your Planar product, please visit http://www.planar.com/support

RoHS Compliance Statement
The Planar EP Series is fully RoHS compliant.

Introduction

The Ultra HD resolution Planar EP Series LCD displays offer best-in-class reliability with the stunning image quality of 4K resolution. The displays come standard with commercial-grade features required for digital signage, corporate, and control room environments.

Also available in touch versions, Ultra HD Planar EP Series displays bring interactivity to the 4K immersive experience.

**Caution:** This manual is intended for use by qualified service persons and end users with experience installing LCD displays.
Safety Information

Before using the Planar EP Series, please read this manual thoroughly to help protect against damage to property, and to ensure personnel safety.

- Be sure to observe the following instructions.
- For your safety, be sure to observe ALL the warnings detailed in this manual.
- For installation or adjustment, please follow this manual’s instructions, and refer all servicing to qualified service personnel.

Safety Precautions

- **If water is spilled or objects are dropped inside the display, remove the power plug from the outlet immediately.** Failure to do so may result in fire or electrical shock. Contact your dealer for inspection.

- **If the display is dropped or the chassis is damaged, remove the power plug from the outlet immediately.** Failure to do so may result in fire or electrical shock. Contact your dealer for inspection.

**WARNING!** Wall mounts must be secure.

- **If the display is hung on a wall, the wall must be strong enough to hold it.** Simply mounting it to wallboard or wall paneling won’t be adequate or safe.

**Caution:** The screen could be damaged by heavy pressure.

- **Slight pressure on the LCD will cause distortion of the image.** Heavier pressure will cause permanent damage. Displays should be mounted where viewers cannot touch the screen or insert small objects in the openings that will create hazards by contacting bare conductive parts.

**Caution:** The front polarizer is soft and subject to scratches from sharp objects.

- **The polarizer is a thin sheet of film laminated to the outside layer of glass on the LCD screen.** Take care when handling items near the screen.

- **If the power cord or plug is damaged or becomes hot, turn off the main power switch of the display. Make sure the power plug has cooled down and remove the power plug from the outlet.** If the display is still used in this condition, it may cause a fire or an electrical shock. Contact your dealer for a replacement.
Important Safety Instructions

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use the display near water.
6. Clean the LCD screens with an LCD screen cleaner or LCD wipes.
7. Do not install near any heat sources such as radiators, heat registers, stoves or other apparatus (including amplifiers) that produce heat.
8. Do not defeat the safety purpose of the polarized or grounding type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong is provided for your safety. When the provided plug does not fit into your outlet, consult an electrician for the replacement of the obsolete outlet.
9. Protect the power cord from being walked on or pinched, particularly at plugs, convenience receptacles and the point where they exit from any of the displays.
10. Only use the attachments/accessories specified by the manufacturer.
11. Unplug all displays during lightning storms or when unused for long periods of time.
12. You must follow all National Electrical Code regulations. In addition, be aware of local codes and ordinances when installing your system.
13. Refer all servicing to qualified service personnel. Servicing is required when any of the displays have been damaged in any way. For example, if the AC power cord or plug is damaged, liquid has been spilled or objects have fallen into a display, the displays have been exposed to rain or moisture, do not operate normally or have been dropped.
14. Keep the packing material in case the equipment should ever need to be shipped.
15. Wall mounts must be secure. The wall must be strong enough to hold all displays, brackets and cables.
16 Slight pressure on the LCD will cause distortion of the image. Heavier pressure will cause permanent damage. Displays should be mounted where viewers cannot touch the screen or insert small objects in the openings that will create hazards by contacting bare conductive parts.

17 The front polarizer is soft and subject to scratches from sharp objects. The polarizer is a thin sheet of film laminated to the outside layer of glass on the LCD screen. Take care when handling items near the screen.

**Recommended Usage**

In order to get the most out of your LCD, use the following recommended guidelines to optimize the display.

**Burn-In Versus Temporary Image Retention**

Burn-in causes the screen to retain an image essentially forever, with little or no way to correct the problem. Under normal use, an LCD will not experience burn-in, as plasma displays do, nor will it retain images in any way.

Normal use of an LCD is defined as displaying continuously changing video patterns or images. However, LCDs can experience *temporary* image retention when recommended usage guidelines are not followed.

**What is Temporary Image Retention?**

Temporary image retention (TIR) can occur when a static image is displayed continuously for extended periods of time (12 hours or longer). An electrical charge differential may build up between the electrodes of the liquid crystal, which causes a negative-color video image (color-inverted and brightness-inverted version of the previous image) to be retained when a new image is displayed. This behavior is true for any LCD device from any LCD manufacturer.

TIR is not covered under warranty. See standard warranty terms and conditions for details. Here are some guidelines to help you avoid TIR:

- Use the LCD to show a screen saver, moving images or still pictures that change regularly. When using high-contrast images, reposition the images frequently.
- Turn off the LCD when it is not in use. To use your source computer’s Power Options Properties, set up your computer to turn off the display when not in use.

**Caution:** For optimal performance, we suggest turning off the backlight power on the display for six hours per day.
European Union Disposal Information

Disposal of old Electrical & Electronic Equipment (Applicable throughout the European Union and other European countries with separate collection programs)

This symbol found on your product or on its packaging, indicates that this product should not be treated as household waste when you wish to dispose of it. Instead, it should be handed over to an applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences to the environment and human health, which could otherwise be caused by inappropriate disposal of this product. The recycling of materials will help to conserve natural resources.

As a European Union and other European countries with separate collection programs, you should: 
- Contact your local authorities or dealer and ask for the correct method of disposal.
- Bring your product to a recycling or collection center authorized to dispose of this type of equipment.
- Contact your local authorities for information about the corresponding recycling of electrical and electronic equipment.

By ensuring this product is correctly disposed of, you contribute to the conservation of resources and to reduce negative consequences to the environment and human health. The recycling of materials will help to conserve natural resources.

In the European Union, this label indicates that this product: 
- May be used for the disassembly of electrical and electronic equipment valid in the Member States of the European Union.
- Was manufactured in conformity with the Waste Electrical and Electronic Equipment Directive "Regulation on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment" (WEEE). 

Si desea deshacerse de este producto, póngase en contacto con sus autoridades locales o con su distribuidor y pida información sobre el método de disposición adecuado.

Pour éliminer votre matériel électrique et électronique dans l'Union européenne, contactez vos autorités locales ou votre distributeur pour plus d'informations.

This symbol, applied on your product or on its packaging, indicates that you should not dispose of it as household waste when you wish to get rid of it. Instead, it should be handed over to an applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences to the environment and human health, which could otherwise be caused by inappropriate disposal of this product. The recycling of materials will help to conserve natural resources.

As a European Union and other European countries with separate collection programs, you should:
- Contact your local authorities or dealer and ask for the correct method of disposal.
- Bring your product to a recycling or collection center authorized to dispose of this type of equipment.
- Contact your local authorities for information about the corresponding recycling of electrical and electronic equipment.

By ensuring this product is correctly disposed of, you contribute to the conservation of resources and to reduce negative consequences to the environment and human health. The recycling of materials will help to conserve natural resources.

In the European Union, this label indicates that this product:
- May be used for the disassembly of electrical and electronic equipment valid in the Member States of the European Union.
- Was manufactured in conformity with the Waste Electrical and Electronic Equipment Directive "Regulation on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment" (WEEE).

This symbol is only valid in the European Union. If you wish to discard this product, please contact your local authorities or dealer and ask for the correct method of disposal.

Esta simbolo sola se válido en la Unión Europea. Si desea desechar este producto, póngase en contacto con las autoridades locales o con el distribuidor para obtener más información sobre el método de disposición adecuado.

Een symbool zoals afgebeeld op dit product is alleen geldig in de Volksrepubliek Duitsland. Neem contact op met uw lokale instanties voor details over de gepaste methode voor afvalverwijdering.

In the European Union, this label indicates that this product:
- May be used for the disassembly of electrical and electronic equipment valid in the Member States of the European Union.

By ensuring this product is correctly disposed of, you contribute to the conservation of resources and to reduce negative consequences to the environment and human health. The recycling of materials will help to conserve natural resources.

In the European Union, this label indicates that this product should not be disposed of with household waste. It should be deposited at an appropriate facility to enable recovery and recycling. EEE complies with Directive 'Regulation on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment'.

CE marking indicates that this product has been examined and verified in accordance with the provisions of the European Union ‘Regulation on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment’ (WEEE).
**Normal Usage Guidelines**

Normal use of the LCD is defined as operating in the open air to prevent heat buildup, and without direct or indirect heat sources such as lighting fixtures, heating ducts, or direct sunlight that can cause the modules to experience high operating temperatures. For all modules, do not block fans or ventilation openings. If the LCD module will be installed in a recessed area with an LCD surround or enclosure, ensure adequate openings are applied for proper air flow and ventilation.

At 3000 meters or below, the maximum ambient operating temperature for the LCD module cannot be above 40° C nor below the minimum ambient operating temperature of 0° C. If one of these conditions exists, it is up to the installer to ensure that module placement is changed, thermal shielding is provided and/or additional ventilation is provided to keep the display within its nominal operating parameters.

**Cooling Requirements**

For optimal performance, active cooling by the installer should be planned for when the ambient temperature at the top of the wall is predicted to be above the specified ambient temperature for the panel. Cooling may be done behind the displays and depending on the wall configuration, it may be helpful to place air ducts (AC) at every third display tall.

**VESA Mounts, General Description**

VESA mounts are used to secure the Planar EP Series for display. The display can be installed using a variety of VESA mounts available through Planar. If you do not have a VESA mount and would like to purchase one, contact Planar.

If you purchased a VESA mount, you should have received a separate box with mounting supplies and an Installation manual. Follow these instructions carefully.

Keep in mind the following general installation guidelines:

- Screw length is crucial and will vary depending on the type of mount you use. Total screw length will include the penetration length plus the length required by the type of VESA mount in use.
- Mount spacers may be required to accommodate the protruding back panel of the OPS slot.

**Caution:** Shorter screws will result in insufficient mounting strength and longer screws could puncture parts inside the display.

- Prior to installation, make sure you know where all of the mounting points are located.
- Follow all safety precautions outlined in the VESA Installation manual.
- Verify the parts received with the list shown in the VESA Installation manual.
Cleaning the Display

If dust has collected on the power plug, remove the plug from the outlet and clean off the dust. Dust build-up may cause a fire.

Remove the power plug before cleaning. Failure to do so may result in electrical shock or damage.

Keep the following points in mind when cleaning the surface of the display:

- When the surface of the display becomes dirty, wipe the surface lightly with a soft clean cloth.
- If the surface requires additional cleaning, use LCD screen cleaner or LCD wipes, which are available at most electronics stores.
- Do not let cleaner seep into the display, as it may cause electrical shock or damage.
Package Contents

Unpacking the Display

The display is packed in a cardboard box using foam to protect it during shipping. Before unpacking the display, prepare a stable, level and clean surface near a wall outlet.

1. Place the LCD panel box in an upright position and remove the carton locks from the bottom first.

2. Remove the entire top of the box and the top shipping foam.

3. Remove the accessory bag and packing list.

Installing the Display

This section explains how to install your display. We suggest that you read the entire section before you attempt to install the unit.

Before You Begin

Make sure you have all the items in these lists before you begin unpacking and installing your display(s).

Tools/Equipment List

Depending on your installation, you may need one or more of the following items:

- String/string level
- Digital/laser level
- Ladders/lift
- Back brace
- Stud finder (if hanging display on a wall)

Other Things You May Need

- LCD screen cleaner or LCD wipes - available at most electronics stores
- At least two very strong people to help lift units into place

Plan Your Installation

You should have a detailed plan of how the units are to be configured. The plan should include calculations for the following:

- Power (maximum of five units per 20A circuit for 115V operation)
- Cable runs
- Ventilation and cooling requirements
- If hanging display on a wall, location of studs in the wall

Prepare Your Installation Location

You should have prepared the area where you will install the unit. If custom enclosures are part of the installation, they must be fully designed to accommodate the installation of the displays, as well as the installed unit and ventilation and cooling requirements.

If your installation included a lot of construction or dust, it is highly recommended that you clean all of the screens after the wall installation and configuration are complete.
Cable Length Recommendations

Cable length performance may vary between different cables and sources. The recommended maximum DisplayPort length is 3m for DisplayPort 1.2 and 5m for DisplayPort 1.1. HDMI cable length is recommended for up to 15m.
Installing OPS Expansion (Optional)

The Planar EP Series displays are equipped with an expansion slot that supports the Intel® Open-Pluggable Specification (OPS). The slot will support OPS devices such as PC’s, SDI modules, HDBaseT receivers, etc.

To install an OPS device, remove the protective cover on the display and slide the device firmly into position. When installed, the OPS device will be connected internally to the display. No external video or power cables are required.

For convenience, two Type-A USB 2.0 ports and one Type-A USB 3.0 port are provided on the rear cover of the display. When an OPS device is installed, these USB ports can be used for a keyboard, webcam, USB drive, or other peripherals.
Operating the Display

OSD Keypad

The OSD keypad is located on the rear of the display.

**OSD Keypad Buttons**

</tr>
</tbody>
</table>

Using the Display in Portrait Mode

When using the display in the portrait position and looking at the rear of the display, it should be rotated according to the arrow stickers on the back of the display. This will allow for proper ventilation. Then select the OSD rotation of landscape or portrait on the OSD menu (MAIN MENU > OSD SETTINGS > OSD ROTATION).

**Caution:** Improper ventilation may shorten the life of the display.

Using the Display in Flat or Tilted Orientation

The display is not recommended for use in flat orientation for tabletop, floor, or ceiling installations. LCD panels of this size are at risk of panel deflection, which can cause cosmetic sagging, brightness uniformity issues, a shortened life span, and malfunction of optional touch sensors. Installations where the display is tilted downward or upward at an angle may also be prone to these issues and are not recommended.
Using the Remote Control

Below is a picture of the remote control and its corresponding Hex codes. See the following page for button descriptions and Hex codes.

### Locking/Unlocking the OSD Menus

You can lock or unlock the OSD menus by pressing a series of key commands on the remote control. To **lock** the menu, press the following keys on the remote in the order listed: ENTER, ENTER, EXIT, EXIT, ENTER and EXIT. To **unlock** it, simply follow the same sequence.

Depending on whether you locked or unlocked the menu, you will see one of the following messages on the screen.

<table>

</table>
Changing the Remote Control Battery

1. **Remove the battery cover.**
   Slide back and remove the battery cover in the direction of the arrow.

2. **Insert the batteries.**
   Align and insert two AAA batteries according to their plus and minus ports (as indicated in the remote control).

3. **Close the battery cover.**
   Replace the battery cover in the direction of the arrow and snap it back into place.

Turning the Display On

1. Insert the power cord into the display and into the power outlet.

2. Ensure the AC switch is set to “—”.

3. Press the power button on the remote or side control panel.
Turning the Display Off

With the power on, press the power button on the remote or side control panel to put the LCD panel in a standby mode. To turn off power completely, turn the AC switch to “O” or disconnect the AC power cord from the power outlet.

**Note:** If there is no signal for a certain period of time, the LCD panel will automatically go into standby mode.

Adjusting the Volume

1. Using the remote, press the VOLUME - or VOLUME + to increase or decrease the volume.
2. Press the MUTE button to temporarily turn off all sound. To restore the sound, press the MUTE button again.

**Note:** The analog audio out is variable. S/PDIF is fixed.

Selecting the Input Source

Do one of the following:

- Using the remote, press the desired source button (DP1, HDMI1, HDMI2, HDMI3, HDMI4, VGA).
- Press the source button on the display’s keypad. Use the arrow buttons (▲▼) to select one of the following input sources and press ENTER: DISPLAYPORT1, HDMI1, HDMI2, HDMI3, HDMI4, VGA.

**Note:** When the display cannot find a source, a “No signal” message will appear.

Navigating Through the Menus

1. With the power on, press MENU. The INPUT menu appears.
2. Within the menu, use ▲,▼,◄,► and ENTER to navigate through the menus and adjust options.
3. Press MENU to return to the previous menu. To exit the menu system, press EXIT.
**Input Menu**

This menu is used for selecting the input sources. Up to four sources can be displayed at the same time.

**Main Input**

Select the Main Input source

**Options:** DisplayPort1, HDMI1, HDMI2, HDMI3, HDMI4, VGA, OPS

**Auto Scan**

Select whether the display will automatically scan for a Main Input source

**Options:** On, Off; **Default:** Off

**Multi-Source Views**

Select the Multi-Source View mode

**Options:** Off, PIP, Dual View, Dual View Portrait, Triple View, Quad View

**Default:** Off

**Source 2**

Select the second source

**Options:** DisplayPort1, HDMI1, HDMI2, HDMI3, HDMI4, VGA, OPS

Note: This function is only available when Multi-Source Views is set to PIP, Dual View, Dual View Portrait, Triple View or Quad View. If HDMI1 was selected as another source, OPS cannot be selected. If OPS was selected as another source, HDMI1 cannot be selected.
**Source 3**

Select the third source  
**Options:** DisplayPort1, HDMI1, HDMI2, HDMI3, HDMI4, VGA, OPS

*Note:* This function is only available when Multi-Source Views is set to Triple View or Quad View. If HDMI1 was selected as another source, OPS cannot be selected. If OPS was selected as another source, HDMI1 cannot be selected.

**Source 4**

Select the fourth source  
**Options:** DisplayPort1, HDMI1, HDMI2, HDMI3, HDMI4, VGA, OPS

*Note:* This function is only available when Multi-Source Views is set to Quad View. If HDMI1 was selected as another source, OPS cannot be selected. If OPS was selected as another source, HDMI1 cannot be selected.

**PIP Size**

Select the size of the PiP (Picture-in-Picture)  
**Options:** Small, Mid, Large

*Note:* This function is only available when Multi-Source Views is set to PiP

**PIP Position**

Set the position of the PiP (Picture-in-Picture)  
**Options:** TopR (Top Right), TopL (Top Left), BotR (Bottom Right), BotL (Bottom Left)

*Note:* This function is only available when Multi-Source Views is set to PiP

**Swap**

Swap the Main Input source with Source 2

*Note:* This function is only available when Multi-Source Views is set to PiP, Dual View, or Dual View Portrait

**Multi-Source Presets**

Save or Recall Multi-Source Preset1, Preset2, Preset3 or Preset4

*Note:* See page 33 for more information.
Multi-Source Presets Submenu

Save and recall up to four configurations of single or multi-source layouts. Source selection and location are saved within each preset.

![Multi-Source Presets Submenu Diagram]

Saving Configurations

1. Set up the single or multi-source layout as desired.

2. Select PRESET1 SAVE, PRESET2 SAVE, PRESET3 SAVE, or PRESET4 SAVE to assign the configuration to one of the preset slots.

Recalling Stored Configurations

1. Select PRESET1 RECALL, PRESET2 RECALL, PRESET3 RECALL, or PRESET4 RECALL in the on screen menu to recall the desired saved configuration. Presets can be also be recalled from RS-232.

**Note:** Presets can be overridden but cannot be deleted.
Picture Menu

This menu is used for making common image adjustments.

Aspect Ratio

Adjust the aspect ratio of the screen. The first selection is for the main source, and the second selection is for sources 2-4.

**Options:** Full Screen, Letterbox, 4:3, 1:1; **Default:** Full Screen

Scheme

Press ‹ or › to select one of the following:

**Options:** User, Vivid, Cinema, Game, Sport; **Default:** User

Contrast

Increase or decrease the contrast of picture. Press ‹ or › to select the desired level.

**Range:** 0~100; **Default:** 50

Brightness

Increase or decrease the brightness of picture. Press ‹ or › to select the desired level.

**Range:** 0~100; **Default:** 50

Sharpness

Adjust the definition of picture. Press ‹ or › to select the desired level.

**Range:** 0~100; **Default:** 50

Hue

Increase or decrease the green hue. Press ‹ or › to select the desired level.

**Range:** 0~100; **Default:** 50

Note: This function is not available when displaying PC or graphics sources
### Saturation

Adjust the brilliance and brightness. Press ◄ or ► to select the desired level.  
**Range:** 0–100; **Default:** 50

Note: This function is not available when displaying PC or graphics sources

### Backlight

Increase or decrease the intensity of the LCD backlight. Press ◄ or ► to select the desired level.  
**Range:** 0–100; **Default:** 80

### Color Temp and Gamma

Select gamma  
**Options:** Off, 1.85, 1.9, 1.95, 2.0, 2.05, 2.10, 2.15, 2.2, 2.25, 2.3, 2.35, 2.4, 2.45, 2.5, 2.55, 2.6  
**Default:** 2.2

Select color temperature  
**Options:** User, 3200K, 5000K, 6500K, 7500K, 9300K; **Default:** 9300K

### HDMI RGB Range

Select RGB range for HDMI sources  
**Options:** Auto, Full, Limited; **Default:** Auto
Picture Menu – RGB Adjust Submenu (Color Temp = User)

**Red Gain**

Set Color Temperature to “User” in order to adjust this setting.

**Range:** 0~100

**Default:** 100

**Green Gain**

Set Color Temperature to “User” in order to adjust this setting.

**Range:** 0~100

**Default:** 100

**Blue Gain**

Set Color Temperature to “User” in order to adjust this setting.

**Range:** 0~100

**Default:** 100

**Red Offset**

Set Color Temperature to “User” in order to adjust this setting.

**Range:** 0~100

**Default:** 50

**Green Offset**

Set Color Temperature to “User” in order to adjust this setting.

**Range:** 0~100

**Default:** 50

**Blue Offset**

Set Color Temperature to “User” in order to adjust this setting.

**Range:** 0~100

**Default:** 50
Advanced Picture Menu

Gamut

Select the range of colors shown on the display

Options:
Native: Selects the maximum range of colors
REC709: Selects the color gamut used in HDTV content
SMPTE C: Selects the color gamut used in SD content in the US
EBU: Selects the color gamut used in SD content in Europe

Default:
EP6514K: Native
Audio Menu

This menu is used for adjusting audio settings.

**Volume**

Adjust the sound. Press ◄ or ► to select the desired level.

**Range:** 0~100

**Default:** 50

**Treble**

Adjust the sound in high tones (treble). Press ◄ or ► to select the desired level.

**Range:** -6~+6

**Default:** 0

**Bass**

Adjust the sound in low tones (bass). Press ◄ or ► to select the desired level.

**Range:** -6~+6

**Default:** 0

**Balance**

Adjust the balance of the left and right speakers. Press ◄ or ► to select the desired level.

**Range:** -6~+6

**Default:** 0

**Internal Speaker**

Turn the internal speaker on or off

**Default:** On
Audio Source

Select the audio source for the Main input

**Options:** DisplayPort1, HDMI1, HDMI2, HDMI3, HDMI4, Line-In

Multi-Source Audio

Select the audio source that is played through the display’s internal speakers, audio out and digital audio out

**Options:** Main Source, Source 2, Source 3, Source 4

**Default:** Main Source

Note: Adjustments to the Audio Source setting will override selections made to Multi-Source Audio. Do not change the Audio Source setting if you plan to make audio source selections in Multi-Source Audio.

Off-screen audio sources can be selected from Audio Source.
# OSD Settings Menu

This menu is used to make initial setup adjustments to the OSD (On-Screen Display) menu and other on-screen messages.

<table>

<tr>
<td><strong>Options:</strong> Landscape, Portrait</td>
<td><strong>Default:</strong> Landscape</td>
</tr>
</tbody>
</table>

![OSD Settings Menu Diagram]
### Language

Select the OSD language

### Splash Screen

Select whether a splash screen appears when the monitor is powered up
- **Options:** On, Off
- **Default:** On

### Message Box

Select whether a message box is displayed on screen
- **Options:** On, Off
- **Default:** On
Auto Adjustment

Force the display to reacquire and lock to the input signal (VGA source only). This is useful when the signal quality is marginal. Note: This feature does not continually reacquire the signal.

**Options:** No, Yes  
**Default:** No

H. Position

Adjust the horizontal position of the image (VGA source only). Press ◀ or ▶ to select the desired level.  
**Range:** 0~100  
**Default:** 50

V. Position

Adjust the vertical position of the image (VGA source only). Press ◀ or ▶ to select the desired level.  
**Range:** 0~100  
**Default:** 50

Phase

Adjust the phase of the displayed signal (VGA source only). Press ◀ or ▶ to select the desired level.  
**Range:** 0~100

Clock

Adjust the clock of the displayed signal (VGA source only). Press ◀ or ▶ to select the desired level.  
**Range:** 0~100
### Overscan

Adjust the zoom (overscan) of the image  
**Default:** 0

### Power LED

Enable or disable the status LED  
**Options:** On, Off  
**Default:** On

### OPS Power Down Check

Allow the display to skip waiting for the OPS module to power down when the display is powering down  
**Default:** On

### Real Time Clock

See details on next page
Real Time Clock Submenu

This menu is used to set the internal clock of the display, and to power on and power off the display at preset times if desired.

### Current Time

Set the year, month, day, and time of day

**Options:** User Mode, Workday Mode, Everyday Mode
Real Time Clock – User Mode

User Mode

Select the power on/off time for each day of the week

Options: Disable, Enable

Use the arrow keys to specify the on and off times.
Real Time Clock – Workday Mode

Workday Mode

Select the power on/off time for Monday–Friday, Saturday, and Sunday

Options: Disable, Enable

Use the arrow keys to specify the on and off times.
Real Time Clock – Everyday Mode

Everyday Mode

Select the power on/off time for all days of the week

Options: Disable, Enable

Use the arrow keys to specify the on and off times.
## Smart Light Control

Enable dynamic contrast (DCR) or ambient light sensor  
**Options:** Off, DCR, Light Sensor  
**Default:** Off

## IRFM

Create slight frame motion to help avoid image retention  
**Options:** On, Off  
**Default:** Off

## MEMC

Enable motion estimation motion compensation (frame interpolation). This improves smoothness for fast motion video content.  
**Options:** Off, Low, Medium, High  
**Default:** Off

## Local Dimming

Enable local dimming of the LCD backlight. This improves black levels and contrast; however for some content it may introduce artifacts.  
**Options:** On, Off  
**Default:** Off

## Noise Reduction

Reduce random noise in the video content  
**Options:** Off, Low, Medium, High  
**Default:** Off
### Power Saving Config

**Options:** Wake on VGA, Wake on All, Always On  
**Default:** Wake on VGA

Note: For Wake on VGA and Wake on All, the display will enter power saving mode if no signal is received for 5 minutes.

### DP Ver.

Select DisplayPort version of the DisplayPort inputs  
**Options:** 1.1, 1.2  
**Default:** 1.2

Note: DisplayPort 1.2 is the more modern standard and supports 3840x2160 @ 60 Hz resolution. However, sometimes DisplayPort 1.1 is needed for compatibility with older graphics cards.

### EDID Setup

Select EDID (Extended Display Identification Data) of the HDMI and DisplayPort inputs  
**Options:** 4K2K, 1080p  
**Default:** 4K2K

Note: Use the 1080p setting for the broadest support of lower resolution sources. Use the 4K2K setting to support high resolution sources such as 3840x2160.

### Touch Control

Select whether the touchscreen controls the internal OPS PC, or controls an external PC via the Touch USB connector  
**Options:** Auto, OPS, External  
**Default:** Auto

### Factory Reset

Restore all settings to their default  
**Options:** No, Yes  
**Default:** No
Communication Menu

This menu configures the display’s RS-232 and Ethernet communication ports.

**Baudrate**

Select the baud rate of the display’s RS-232 port  
*Options:* 115200, 38400, 19200, 9600  
*Default:* 19200

**Enable Network**

Enable the display’s built-in Ethernet port  
*Options:* No, Yes  
*Default:* No

**IP Address Settings**

Enable Dynamic IP mode or set the static IP address of the display’s Ethernet port

**Power Status Alert**

Enable an automatic alert when the display is powered down  
*Options:* No, Yes  
*Default:* No

**Source Status Alert**

Enable an automatic alert when the source is changed  
*Options:* No, Yes  
*Default:* No
Assigning an IP Address to the Display

To assign an IP address to your display, access the IP Address Settings Menu in the Communication menu. Consult your system administrator if you do not know how to configure the parameters shown in the menu.

The default settings are shown below.

<table>
<thead>
<tr>
<th>Item</th>
<th>Setting</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>DNS Addr.</td>
<td>192.168.2.1</td>
</tr>
</tbody>
</table>
Information Menu

This read-only menu provides information on the active sources and the latest firmware version.
Using the Touch Screen

You can use the touch screen to control your operating system. The touch screen can emulate basic mouse functions and supports multi-touch functions for Windows 7* and Windows 8*. The following table shows a list of functions you can use on the touch screen.

**Note:** *Ensure that you have installed the USB cable on the display to a computer.*

**Note:** If an OPS PC is installed in the OPS slot, the OPS PC will automatically be connected internally to the touch system. The touch functionality is configurable via the Touch Control setting.

Performing basic functions

The following table shows how to perform basic tasks using the touch screen for Windows 8, Windows 7, Vista, XP, Mac OSX, and Linux.

<table>
<thead>
<tr>
<th>Function</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Click</td>
<td>Tap the screen once.</td>
</tr>
<tr>
<td>Double-Click</td>
<td>Tap the screen twice.</td>
</tr>
</tbody>
</table>
### Performing basic functions

<table>

</tbody>
</table>
Touchscreen MultiTouch Driver Installation

1. With the PC on, plug in the USB memory stick to the USB drive.
2. Locate and open the USB drive.
3. Double-click on the “mt_driver_kit [xxxxxx].exe” to install the driver.
4. Follow installation prompts until driver installation is complete.
Once driver installation is complete, the touchscreen is ready for use.

Touchscreen (PQLabs) MultiTouch Platform Content

The PQLabs Software is used for troubleshooting and calibration. The different menus are described below.

1. On the PC, select the Start menu, All Programs and then PQLabs Software.
2. Click on “MultiTouch Platform” to open the PQLabs MultiTouch Platform window.

Touchscreen Information
- Serial Number – Displays the serial number of the connected touchscreen.
- Firmware Version – Displays the firmware version of the touchscreen selected under the “Serial Number” dropdown menu.
- Touch Points – Displays the number of touch points for which the touchscreen is capable.
- Status – Displays the current status of the touchscreen.

Calibration
- Calibration – Starts a 4-point calibration of the touchscreen. Perform the programmed touchscreen calibration process. At the conclusion of the calibration routine your touchscreen device is ready to use and will perform with accurately positioned touch points.
- Reset Calibration – Resets calibration to factory default settings.

Utility
- Diagnose – Starts the “MultiTouchDoctor” program. This can be used to troubleshoot issues with the touchscreen.

Options
- Default settings on options have the following programs enabled: Tuio Support, Flash Tuio Support, Handwriting Optimization, Enable Windows Native Touch, Enable Mouse/Keyboard Simulation, and Launch When Windows Starts Up.
- Flexible Scan Rate is at a default setting.
Uninstalling the MultiTouch Driver

1. On the PC, select the Start menu, All Programs and the PQLabs Software.
2. Click on the MultiTouch Driver.
3. Select the Uninstall option.

Multi-Touch Functions

The following table shows how to perform multi-touch tasks using the touch screen for Windows 7 - Home Premium, Professional, Enterprise and Ultimate versions.

<table>
<thead>
<tr>
<th>Function</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Right-click</td>
<td>Press on the target. Tap the screen with another finger. Release the second finger.</td>
</tr>
<tr>
<td>Scrolling</td>
<td>Drag one or two fingers up or down.</td>
</tr>
<tr>
<td>Zoom</td>
<td>Move two fingers apart or toward each other.</td>
</tr>
</tbody>
</table>
| Rotate     | • Move two fingers in opposing directions  
              • Use one finger to pivot around the other. |
LAN Control

The Planar EP Series supports extending access to the RS232 commands over a network connection using a virtual COM port (VCOM). The VCOM driver installer is included on the USB drive that came with your display.

Note: RS232 commands over LAN can be achieved by opening a TCP connection to Port 23 to the display. The LAN control functionality is most frequently used by control systems, and they won’t be able to use the VCOM drivers.

Supported Operating Systems

The utility supports the following operating systems:

- Windows XP
- Windows Vista
- Windows 7
- Windows 8 and 8.1
Installation

Use the following instructions to install the VCOM driver.

1. Launch the vcomsetup.exe file.

2. You may see a security warning similar to the following example. Click Run to continue.
3 The vcomsetup.exe installer installs both the VCOM virtual serial port and also a utility (WinPcap) for finding your displays on the network. Follow the steps in the two installers, accepting defaults and license agreements as needed.
4 When the installers are finished, you will see a VCOM icon on your desktop and you find two new folders in your start menu: IC Plus corp (with VCOM sub folder) and WinPcap. If you need to uninstall the software, there are shortcuts to uninstall from these menus.
Configuring VCOM

Use the VCOM shortcut to launch the VCOM setup utility. The utility starts up on the Device Info page, shown below. The controls on this page allow you to find and configure each display that you want to access via virtual COM ports.
Click on COM Mapping to display the COM Mapping page, shown below. The controls on this page allow you to make virtual COM ports and select the display to which you want to map each virtual COM port.

![COM Mapping Page]

- Create a virtual COM port
- Remove an existing virtual COM port
Function Descriptions

Search

In the Device Info page, click the Search icon. This function searches for any devices that are connected to the same network segment (maximum of 254 devices) as your PC. Any devices found will be listed in the Device Info table.

Search By IP

On the Device Info page, click the Search by IP icon. This function searches for any devices in the given IP address range. Any devices found will be listed in the Device Info table.
Configure IP Address

This function allows you to configure the network settings of the selected device. We recommend using the on-screen menus or the web interface described in the User Guide instead of this function.

![Configure IP Address Dialog]

**Note:** To cancel this function, scroll to the bottom and click the Cancel button.

Web

Click the Web icon to launch your default browser and link it to the display's web service.
Adding a Virtual COM Port

To add a virtual COM port, click the Add icon on the COM Mapping page to open the following dialog window.

Select the display you want to control from the table and accept defaults, as shown. Make a note of the COM number assigned to the new VCOM port. Click OK to create the new port. The new port appears in the COM Mapping table.
Removing a COM Port

You can view details for the virtual COM port device using Device Manager, shown below.

![Device Manager screenshot]

Removing a COM Port

On the COM Mapping page, select the COM port you want to delete and click the REMOVE button.
Setting Up Email Alerts

The web service allows you to configure the settings required to send email alerts. If you are not using email alerts, you do not need to use the web service and can skip this section.

Login

When you direct your browser to the network IP address of the display, you are prompted to login as shown here.

The default ID is admin and the default password is system.

Note: Cookies and JavaScript must be enabled in your browser.

Note: If your session times out or if you enter an incorrect ID or password, you will see the following message.

Error
Invalid User name or Password

ok
When you first login, you will see the System Status page, as shown here.
Administrator

Click on the word Administrator under the Planar logo to show/hide these menu items.

Authentication Configuration

Set user ID and password for login to the web service.

System IP Configuration

You can view and/or change the network settings here. However, for best results, we recommend that you use the on-screen display menus.

If your network requires a VLAN tag, your network administrator will give you a number from 1 to 4094 to enter here.
System Status

- Kernel version - Shows the firmware version for the network interface.
- MAC Address - Shows the unique address assigned to the network interface.
- Nickname - Enter a device tag, up to 12 characters. This tag will appear in email alerts, which help you identify the source of the alert.

Load Default Setting

1. Click the LOAD button to return the network interface to default settings.

2. After a few seconds, you will see a green box with the message “Setting Saved RESET.” Click the RESET button to restart the network interface.
3  Make sure the IP address in your browser is correct and then click OK.

4  When the process is complete, you should see the login page again.

Firmware Update and Boot Loader Upgrade

In most cases, you will not need to update firmware for the network interface. If you do, contact Planar’s Technical Support Department. See “Accessing Planar’s Technical Support Website” on page 80 for more information.

**WARNING!** Do not use the controls in these two sections unless you have received a specific procedure and firmware from Planar. Following improper procedures can disable the network interface and require factory repair service.
TCP Mode, UDP Mode and UART

For normal operation, you will not need to change any settings on these pages. If you do need to change information, Planar’s Technical Support Department will provide you with more information.

SMTP

SMTP setup

<table>
<thead>
<tr>
<th>Enable SMTP</th>
<th>Port: 25</th>
</tr>
</thead>
<tbody>
<tr>
<td>SMTP server address</td>
<td>smtp.xxx.yyy</td>
</tr>
<tr>
<td>SMTP Login Information</td>
<td>Enable</td>
</tr>
<tr>
<td>Username: username, Password: *******</td>
<td></td>
</tr>
<tr>
<td>Mail to</td>
<td><a href="mailto:xxx@yyy.zzz">xxx@yyy.zzz</a></td>
</tr>
<tr>
<td>Mail from</td>
<td><a href="mailto:yyy@xxx.zzz">yyy@xxx.zzz</a></td>
</tr>
</tbody>
</table>
Your network administrator must provide information for the following fields:

- **Enable SMTP** - Make sure this checkbox is checked. Port 25 is the default.
- **SMTP Server Address** - Name or IP address of the mail server.
- **SMTP Login Information** - If required, check the ENABLE box and enter a username and password.
- **Mail to** - Enter the destination email addresses. Separate multiple addresses with a semi-colon.
- **Mail from** - Enter the email address from which you want to send alerts.

<table>
<thead>
<tr>
<th>SMTP 01 Warning</th>

<th>Power Status Change Alert</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subject</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Message Body</td>
<td></td>
<td>SMTP 01 body</td>
</tr>
<tr>
<td></td>
<td></td>
<td>max: 100</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SMTP 02 Warning</th>
<th>Subject</th>
<th>Source Change Alert</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subject</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Message Body</td>
<td></td>
<td>SMTP 02 body</td>
</tr>
<tr>
<td></td>
<td></td>
<td>max: 100</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SMTP 03 Warning</th>
<th>Subject</th>
<th>Signal Lost Alert</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subject</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Message Body</td>
<td></td>

</tr>
<tr>
<td></td>
<td></td>
<td>max: 100</td>
</tr>
</tbody>
</table>

You can edit the subject and body of the email warnings, which are sent when there is a power status change, source change and signal lost. The SMTP 04 and 05 warnings are not used.

**Reset Device**

Click the **RESET** button to reboot the network interface. Note that the current settings are not changed.
## Signal Compatibility

Troubleshooting

Before calling service personnel, please check the following table for a possible cause of the problem you are experiencing. Please note the following:

- Perform the adjustments according to "Operating the Display" on page 23.
- If the problem you have experienced isn’t described below or you can’t correct the problem, stop using the display and contact Planar’s Technical Support Department. (See "Accessing Planar’s Technical Support Website" on page 80)
