Before operating the monitor, please read this manual thoroughly. This manual should be retained for future reference.

FCC Class B Radio Frequency Interference Statement

WARNING: (FOR FCC CERTIFIED MODELS)

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

NOTICE:

1. The changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
2. Shielded interface cables and AC power cord, if any, must be used in order to comply with the emission limits.
3. The manufacturer is not responsible for any radio or TV interference caused by unauthorized modification to this equipment. It is the responsibilities of the user to correct such interference.

WARNING:

To prevent fire or shock hazard, do not expose the monitor to rain or moisture. Dangerously high voltages are present inside the monitor. Do not open the cabinet. Refer servicing to qualified personnel only.

| POUR VOTRE SÉCURITÉ

Avant d'utiliser le moniteur, veuillez lire attentivement le présent manuel. Ce manuel doit être conservé pour référence future.

Déclaration FCC d'interférence de radiofréquence classe B **AVERTISSEMENT : (POUR LES MODÈLES CERTIFIÉS FCC)**

REMARQUE : Cet équipement a été testé et déclaré conforme aux limites d'un appareil numérique de classe B, conformément à la partie 15 de la réglementation de la FCC. Ces limites sont conçues pour offrir une protection raisonnable contre les interférences nuisibles dans une installation résidentielle. Cet équipement génère, utilise et peut émettre de l'énergie de radiofréquence, et s'il n'est pas installé et utilisé conformément aux instructions, peut provoquer des interférences nuisibles aux communications radio. Cependant, il n'est pas garanti qu'aucune l'interférence ne se produira pas dans une installation particulière. Si cet appareil provoque des interférences nuisibles à la réception de la radio ou de la télévision, ce qui peut être déterminé en mettant l'appareil hors tension puis sous tension, l'utilisateur est invité à essayer de corriger l'interférence par une ou plusieurs des mesures suivantes :

1. Réorienter ou déplacer l'antenne de réception.
2. Augmenter la distance entre l'équipement et le récepteur.
3. Brancher l'appareil sur une prise d'un circuit différent de celui auquel le récepteur est connecté.
4. Consulter le revendeur ou un technicien radio / TV expérimenté.

AVIS :

1. Les changements ou modifications non expressément approuvés par la partie responsable de la conformité peuvent annuler l'autorisation de l'utilisateur à faire fonctionner l'équipement.
2. Il faut utiliser des câbles d'interface et un cordon d'alimentation secteur blindés, le cas échéant, dans le but de se conformer aux limites d'émission.
3. Le fabricant n'est pas responsable des interférences radio ou TV provoquées par une modification non autorisée de cet équipement. Il est de la responsabilité de l'utilisateur de corriger de telles interférences.

AVERTISSEMENT :

Pour éviter un incendie ou un choc électrique, ne pas exposer le moniteur à la pluie ni à l'humidité. Des hautes tensions dangereuses sont présentes à l'intérieur du moniteur. Ne pas ouvrir le boîtier. Confiez l'entretien à un personnel qualifié uniquement.

PRECAUTIONS

- Do not use the monitor near water, e.g. near a bathtub, washbowl, kitchen sink, laundry tub, swimming pool or in a wet basement.
- Do not place the monitor on an unstable cart, stand, or table. If the monitor falls, it can injure a person and cause serious damage to the appliance. Use only a cart or stand recommended by the manufacturer or sold with the monitor. If you mount the monitor on a wall or shelf, use a mounting kit approved by the manufacturer and follow the kit instructions.
- Slots and openings in the back and bottom of the cabinet are provided for ventilation. To ensure reliable operation of the monitor and to protect it from overheating, be sure these openings are not blocked or covered. Do not place the monitor on a bed, sofa, rug, or similar surface. Do not place the monitor near or over a radiator or heat register. Do not place the monitor in a bookcase or cabinet unless proper ventilation is provided.
- The monitor should be operated only from the type of power source indicated on the label. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.
- The monitor is equipped with a three-pronged grounded plug, a plug with a third (grounding) pin. This plug will fit only into a grounded power outlet as a safety feature. If your outlet does not accommodate the three-wire plug, have an electrician install the correct outlet, or use an adapter to ground the appliance safely. Do not defeat the safety purpose of the grounded plug.
- Unplug the unit during a lightening storm or when it will not be used for long period of time. This will protect the monitor from damage due to power surges.
- Do not overload power strips and extension cords. Overloading can result in fire or electric shock.
- Never push any object into the slot on the monitor cabinet. It could short circuit parts causing a fire or electric shock. Never spill liquids on the monitor.
- Do not attempt to service the monitor by yourself; opening or removing covers can expose you to dangerous voltages and other hazards. Please refer all servicing to qualified service personnel.
- To ensure satisfactory operation, use the monitor only with UL listed computers which have appropriate configured receptacles marked between 100 - 240V AC, Min. 5A.
- The wall socket shall be installed near the equipment and shall be easily accessible.

PRÉCAUTIONS

- Ne pas utiliser le moniteur près de l'eau, par exemple près d'une baignoire, d'un lavabo, d'un évier, d'un bac à linge, d'une piscine ou dans un sous-sol humide.
- Ne pas placer le moniteur sur un chariot, un support ou une table. Si le moniteur tombe, il peut blesser quelqu'un et causer de graves dommages à l'appareil. Utiliser uniquement un chariot ou un support recommandé par le fabricant ou vendu avec le moniteur. Si vous montez le moniteur sur un mur ou sur une étagère, utilisez un kit de montage approuvé par le fabricant et suivez les instructions du kit.
- Les fentes et ouvertures au dos et au bas du boîtier sont prévues pour la ventilation. Pour assurer un fonctionnement fiable du moniteur et le protéger contre toute surchauffe, assurez-vous que ces ouvertures ne sont pas obstruées. Ne pas placer le moniteur sur un lit, un canapé, un tapis ou une surface similaire. Ne pas placer le moniteur près d'un radiateur ou d'un convecteur, ni dessus. Ne pas placer le moniteur dans une bibliothèque ou dans une armoire à moins qu'une ventilation adéquate ne soit prévue.
- Le moniteur ne doit être utilisé qu'avec le type de source d'alimentation indiqué sur l'étiquette. Si vous n'êtes pas certain du type d'alimentation de votre domicile, consultez votre revendeur ou la compagnie d'électricité locale.
- Le moniteur est équipé d'une prise de terre à trois broches, fiche standard avec une troisième broche (pour la terre). Cette fiche ne peut être insérée que dans une prise reliée à la terre, comme dispositif de sécurité. Si votre prise ne peut pas accueillir la fiche à trois fils, un électricien pour installer une prise appropriée, ou vous pouvez utiliser un adaptateur pour relier l'appareil à la masse en toute sécurité. Ne pas neutraliser le dispositif de sécurité que constitue la prise de terre.
- Débranchez l'appareil pendant les orages ou quand il n'est pas prévu de l'utiliser pendant une période prolongée. Cela permet de protéger l'écran contre les dommages dus aux surtensions.
- Ne pas surcharger les multiprises d'alimentation ni les rallonges. Une surcharge peut provoquer un incendie ou un choc électrique.
- Ne jamais enfoncer d'objet dans la fente du boîtier du moniteur. Cela pourrait mettre en court-circuit des pièces et provoquer un incendie ou un choc électrique. Ne jamais renverser de liquide sur le moniteur.
- Ne pas tenter de réparer le moniteur par vous-même; l'ouverture ou la dépose des capots peut vous exposer à des tensions dangereuses et à d'autres risques. Veuillez vous référer à du personnel de service qualifié pour toute réparation.
- Pour assurer un fonctionnement satisfaisant, utiliser le moniteur uniquement avec des ordinateurs agréés UL ayant des réceptacles de prises appropriés marqués entre 100 - 240V AC, Min. 5A.
- La prise secteur doit être installée près de l'équipement et rester facilement accessible.

WEEE DECLARATION

Disposal of Waste Equipment by Users in Private Household in the European Union.

This symbol on the product or on its packaging indicates that this product must not be disposed of with your other household waste. Instead, it is your responsibility to dispose of your waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help to conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

SPECIAL NOTES ON LCD MONITORS

The following symptoms are normal with LCD monitor and do not indicate a problem.

NOTES

- Due to the nature of the fluorescent light, the screen may flicker during initial use. Turn off the Power Switch and then turn it on again to make sure the flicker disappears.
- You may find slightly uneven brightness on the screen depending on the desktop pattern you use.
- The LCD screen has effective pixels of 99.99% or more. It may include blemishes of 0.01% or less such as a missing pixel or a pixel lit all of the time.
- Due to the nature of the LCD screen, an after image of the previous screen may remain after switching the image, when the same image is displayed for hours. In this case, the screen is recovered slowly by changing the image or turning off the Power Switch for hours.
- When the screen becomes black or flashing, or cannot illuminate any more, contact your dealer or service center to replace parts. Don't repair the screen by yourself!

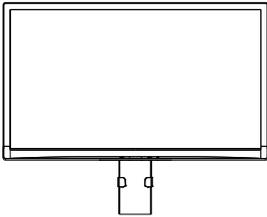

| BEFORE YOU OPERATE THE MONITOR

FEATURES

- 28" (70.9 cm) TFT Color LCD Monitor
- Crisp, Clear Display for Windows
- Recommended Resolutions: 3840*2160@60Hz
- LED Backlight, energy efficient
- Ergonomic Design
- Space Saving, Compact Case Design

PACKAGE LIST

The product package should include the following items:

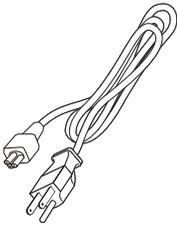

Monitor

Stand

User's Guide

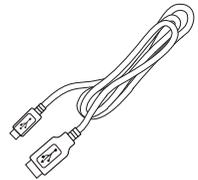

Power Cable

DP Cable

HDMI Cable

USB Cable

INSTALLATION INSTRUCTIONS

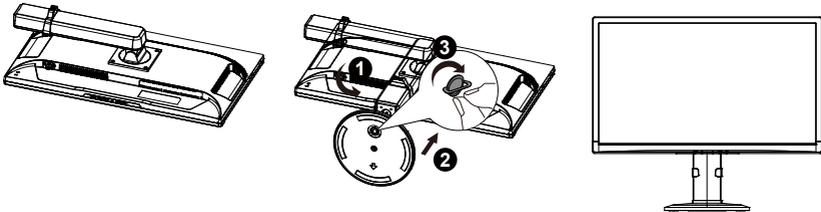

STAND BASE INSTALLATION

The monitor is supplied complete with a stand. If you prefer to wall mount the monitor, please follow the instructions on page 21 to remove the stand. Be sure to include the stand with the monitor if it is necessary to return the unit.

- CAUTION**
- Put the monitor on a stable surface. The monitor may cause injury or damage if it falls or is dropped.
 - Do not give a strong impact to the monitor. It may cause damage.
 - Unplug the monitor before removal or installation to avoid electric shock or damage.

<Installation>

1. Put a piece of soft cloth on the table beforehand to prevent the monitor from being scratched. Lay the monitor flat on a table with front face down. Turn the stand counter-clockwise.
2. Install the Stand-Base to the Monitor.
3. Fix the monitor to the stand by using the screw. Once screw is securely fastened, push down the knob on the screw.

<Remove>

1. Put a piece of soft cloth on the table beforehand to prevent the monitor from being scratched. Lay the monitor flat on a table with front face down.
2. Pull up the knob of the screw, and remove the screw and the Stand-Base.

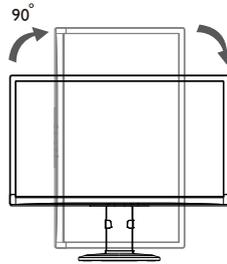

ADJUSTING THE VIEWING ANGLE

- For optimal viewing it is recommended to look at the full face of the monitor, then adjust the monitor's angle to your own preference.
- Hold the stand so you do not topple the monitor when you change the monitor's angle.
- You are able to adjust the monitor as below:

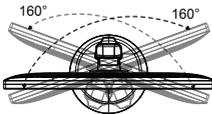

Tilt angle: $-5^{\circ} \sim 23^{\circ}$

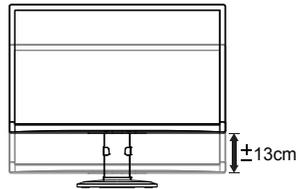

Pivot angle: $0^{\circ} \sim 90^{\circ}$

Swivel angle: $-160^{\circ} \sim 160^{\circ}$

Height adjustment:

NOTES

- Do not touch the LCD screen when you change the angle. It may cause damage or break the LCD screen.
- Careful attention is required not to catch your fingers or hands when you change the angle.

CONTROLS AND CONNECTORS

POWER CORD

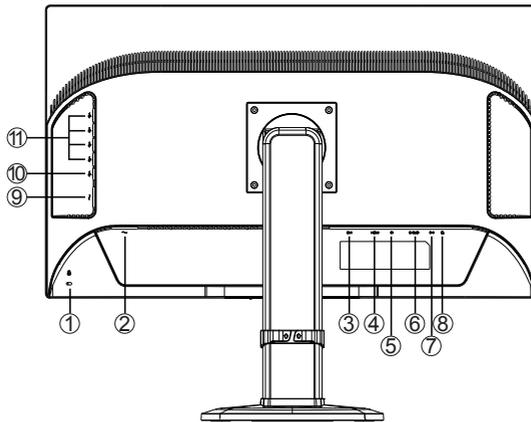

Power Source:

1. Make sure that the power cord is the correct type required in your area.
2. This LCD monitor has an internal universal power supply that allows operation in either 100/120V AC or 220/240V AC voltage area (No user adjustment is required.)
3. Connect the AC-power cord into your LCD monitor's power input socket, The AC-power cord may be connected to either a wall power outlet or the power outlet socket on your PC, depending on the type of power cord supplied with your LCD monitor.

SIGNAL CABLE

Connecting the Signal Cable : Plug one end of the signal cable to the LCD monitor and the other end to a computer or a video source.

Caution: If the AC outlet is not grounded (with three holes), install the proper grounding adapter (not supplied).

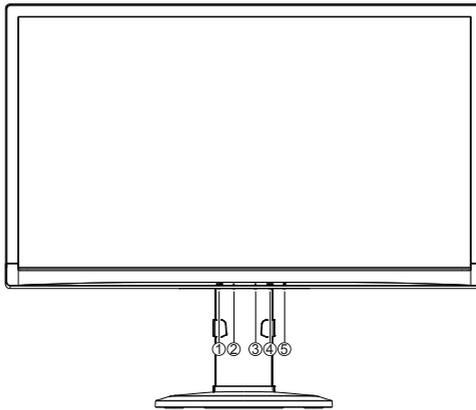

1.	Kensington anti-theft lock
2.	Power input
3.	DVI input
4.	HDMI input
5.	DP input
6.	D-SUB input
7.	Audio input
8.	Earphone jack
9.	Power Switch
10.	USB Cable (upstream)
11.	USB Cable*4(downstream)

| OPERATING INSTRUCTIONS

GENERAL INSTRUCTIONS

Press the power button to turn the monitor on or off. The other control buttons are located at front panel of the monitor. By changing these settings, the picture can be adjusted to your personal preferences.

- The power cord should be connected.
- Connect the video cable from the monitor to the video card.
- Press the power button to turn on the monitor. The power indicator will light up.

1.	Source/AutoAdjust/EXIT button
2.	ECO (-)
3.	Volume Hotkey/ Audio Source(+)
4.	Menu / Enter
5.	Power button

FRONT PANEL CONTROL

- **Power Button:**

Press this button to switch ON/OFF monitor's power.

- **Power Indicator:**

Blue — Power On mode.

Orange —Standby.

Off —Off mode.

- **MENU / ENTER :**

Activates OSD menu or function adjust confirm.

- **ECO/(-)**

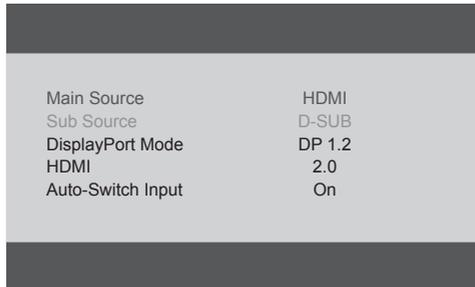

Activates the ECO control when the OSD is OFF or navigate through adjustment icons when OSD is ON or adjust a function when function is activated.

- **Volume +/- :**

Activates the volume control and audio source when the OSD is off or navigate through adjustment icons when OSD is On or adjust a function when function is activated.

- **Source / Adjust / Exit**

When the OSD is off, pressing Auto/Source button will activate Source menu. Choose between sources, PIP/PBP sub source, DP 1.1 or 1.2, HDMI 1.4 or 2.0 using the +/- keys, turn on or off Auto Source. Press Menu/Enter button to change to the desired selection. Auto configure hot key: (VGA input only) When the OSD is off, press and hold own the button for 2 seconds to auto configure. When OSD menu is ON, this button will act as an Exit Key (Exit OSD menu)

Main Source	HDMI
Sub Source	D-SUB
DisplayPort Mode	DP 1.2
HDMI	2.0
Auto-Switch Input	On

OSD Lock Function: Lock-All 4 buttons are locked except "POWER" button.

To lock the OSD, press and hold the MENU button while the monitor is off and then Press power button to turn the monitor on. To un-lock the OSD, press and hold the MENU button while the monitor is off and then press power button to turn the monitor on.

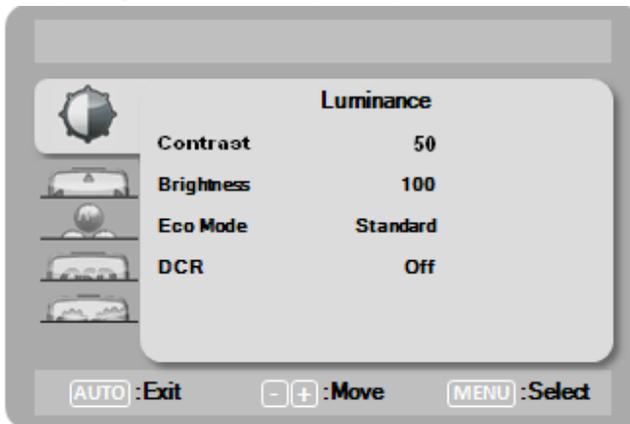

NOTES

- Do not install the monitor in a location near heat sources such as radiators or air ducts, or in a place subject to direct sunlight, or excessive dust or mechanical vibration or shock.

- Save the original shipping carton and packing materials, as they will come in handy if you ever have to ship your monitor.
- For maximum protection, repackage your monitor as it was originally packed at the factory.
- To keep the monitor looking new, periodically clean it with a soft cloth. Stubborn stains may be removed with a cloth lightly dampened with a mild detergent solution. Never use strong solvents such as thinner, benzene, or abrasive cleaners, since these will damage the cabinet. As a safety precaution, always unplug the monitor before cleaning it.
- Do not scratch the screen with hard things, it may cause permanent damage.
- Don't leak liquid into monitor which will result in the damage of component.

HOW TO ADJUST A SETTING

1. Press the MENU-button to activate the OSD window.
2. Press + or - to navigate through the functions. Once the desired function is highlighted, press the MENU-button to activate it. If the function selected has a sub-menu, press + or - again to navigate through the sub-menu functions. Once the desired function is highlighted, press MENU-button to activate it.
3. Press + or - to change the settings of the selected function.
4. If you want to adjust any other function, repeat steps 2-3.

ADJUSTING THE PICTURE

Main Menu Item	Main Menu Icon	1 st Sub Menu Item	Description

		DDC/CI	Select DDC/CI on or off.
		Reset	Set Monitor to default status.
		Information	Show the resolution, H/V frequency of current input timing.

PLUG AND PLAY

Plug & Play DDC2B Feature

This monitor is equipped with VESA DDC2B capabilities according to the VESA DDC STANDARD. It allows the monitor to inform the host system of its identity and, depending on the level of DDC used, communicate additional information about its display capabilities.

The DDC2B is a bidirectional data channel based on the I²C protocol. The host can request EDID information over the DDC2B channel.

THIS MONITOR WILL APPEAR TO BE NON-FUNCTIONAL IF THERE IS NO VIDEO INPUT SIGNAL. IN ORDER FOR THIS MONITOR TO OPERATE PROPERLY, THERE MUST BE A VIDEO INPUT SIGNAL.

This monitor meets the Green monitor standards as set by the Video Electronics Standards Association (VESA) and The Swedish Confederation Employees (NUTEK). This feature is designed to conserve electrical energy by reducing power consumption when there is no video-input signal present. When there is no video input signal this monitor, following a time-out period, will automatically switch to an OFF mode. This reduces the monitor's internal power supply consumption. After the video input signal is restored, full power is restored and the display is automatically redrawn. The appearance is similar to a "Screen Saver" feature except the display is completely off. The display is restored by pressing a key on the keyboard, or clicking the mouse.

USING THE RIGHT POWER CORD :

The accessory power cord for the Northern American region is the wallet plug with NEMA 5-15 style and is UL listed and CSA labeled. The voltage rating for the power cord shall be 125 volts AC.

Supplied with units intended for connection to power outlet of personal computer: Please use a cord set consisting of a minimum No. 18 AWG, type SJT or SVT three conductors flexible cord. One end terminates with a grounding type attachment plug, rated 10A, 250V, CEE-22 male configuration. The other end terminates with a molded-on type connector body, rated 10A, 250V, having standard CEE-22 female configuration.

Please note that power supply cord needs to use VDE 0602, 0625, 0821 approval power cord in European countries.

TECHNICAL SUPPORT (FAQ)

Problem & Question	Possible Solution
Power LED is not on	<ul style="list-style-type: none"> * Check if the Power Switch is in the ON position. * Power Cord should be connected.
No Plug & Play	<ul style="list-style-type: none"> * Check if the PC system is Plug & Play compatible. * Check if the Video Card is Plug & Play compatible . * Check if the D-15 plug pin of Video Cable is bent.
Picture is fuzzy	<ul style="list-style-type: none"> * Adjust the Contrast and Brightness Controls.
Picture bounces or a wave pattern is present in the picture	<ul style="list-style-type: none"> * Move electrical devices that may cause electrical interference.
The power LED is ON (orange) but there's no video or no picture.	<ul style="list-style-type: none"> * Computer Power Switch should be in the ON position. * Computer Video Card should be snugly seated in its slot. * Make sure monitor's video cable is properly connected to the computer. * Inspect monitor's video cable and make sure none of the pins are bent. * Make sure computer is operational by hitting the CAPS LOCK key on the keyboard while observing the CAPS LOCK LED.The LED should either turn ON or OFF after hitting the CAPS LOCK key.
Missing one of the primary colors (RED, GREEN, or BLUE)	<ul style="list-style-type: none"> * Inspect the monitor's video cable and make sure that none of the pins are bent.
Screen image is not centered or sized properly.	<ul style="list-style-type: none"> * Adjust pixel frequency (CLOCK) and FOCUS or press hot-key (AUTO).
Picture has color defects (white does not look white)	<ul style="list-style-type: none"> * Adjust RGB color or select color temperature.
Poor brightness or contrast	<ul style="list-style-type: none"> * When the brightness of the screen lowers after being used for a certain period and the function of the display is affected, send it to our authorized service center for repair.
Horizontal or vertical disturbances on the screen	<ul style="list-style-type: none"> * Use win 95/98/2000/ME/XP/Win 7/Win 8 shut-down mode Adjust CLOCK and FOCUS or perform hot- key (AUTO-key).

TECHNICAL SUPPORT (FAQ)

CLOCK (pixel frequency) controls the number of pixels scanned by one horizontal sweep. If the frequency is not correct, the screen shows vertical stripes and the picture has not correct width.

FOCUS adjusts the phase of the pixel clock signal. With a wrong phase adjustment the picture has horizontal disturbances in light picture.

ERROR MESSAGE & POSSIBLE SOLUTION

NO SIGNAL:

1. Check that the signal-cable is properly connected, if the connector is loose,tighten the connector's screws.
2. Check the signal-cable's connection pins for damage.

INPUT NOT SUPPORT:

Your computer has been set to unsuitable display mode, set the computer to display mode given in the following table.

WALL MOUNTING (OPTIONAL)

Refer to the instructions that come with the base mounting kit. To convert your LCD display from a desk-mounted to a wall-mounted display, do the following:

1. Verify that the Power button is turned Off, then disconnect the power cord.
2. Lay the LCD display face down on a towel or blanket.
3. Remove the four screws attaching the base (Screw dimension: M4 x 14mm).
4. Attach the mounting bracket from the VESA compatible wall mounting kit (100 mm x 100 mm distance).
5. Attach the LCD display to the wall, following the instructions in the wall-mounting kit.

NOTE: For use only with Wall Mount Bracket with minimum weight/load: 12kg.
