

The Leyard® Video Controller (VC) is a compact yet powerful rack-mount processor that can cascade to support large video walls and provide windowing and Picture-in-Picture (PiP) for source flexibility. It includes Planar® Big Picture Plus™ video wall processing, which can scale sources across the entire video wall or across sections of the video wall. The Leyard Video Controller offers configuration, control and monitoring from the modern web-based Leyard® WallDirector™ software interface. The VC incorporates Leyard® WallSync™, providing precisely synchronized video playback and genlock across the video wall.

The Leyard Video Controller (VC) comes standard as part of the Leyard® DirectLight® X LED Video Wall System and Clarity® Matrix® G3 LCD Video Wall System.
