

Planar VS Series

Rental & Staging LED Video Wall

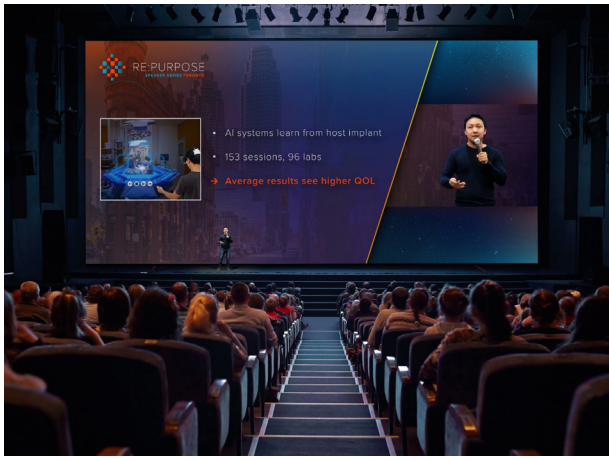

Indoor Rental & Staging LED Video Wall

The Planar® VS Series of LED video wall displays takes event viewing experiences to the next level. With strikingly crisp, bright images that entice audiences, and mechanical elements designed to hold up to stagers' frequent, fast assembly and teardown, the Planar VS Series is the right choice for concerts, exhibitions or tradeshows.

Planar VS Series video walls feature high brightness and small pixel pitch to deliver outstanding image quality to event audiences. With pixel pitches as small as 2.5 millimeters, even front-row viewers just beyond a standard stage will have a challenging time seeing individual pixels. The indoor model looks excellent in high ambient light applications, offering 1000-nit brightness and 4000:1 contrast ratio. Planar VS Series' 500x500 millimeter cabinets attach together seamlessly, maximizing the viewing experience without any visual hardware distractions.

If you want a curved effect to engulf a stage; no problem. Connected Planar VS Series cabinets can effortlessly, and securely, deliver 5 degrees of convex or concave curve with on-board angle blocks.

Set-up & Teardown without the Breakdown

Hang or stack Planar VS Series LED cabinets with the same hardware. Universal header and floor stand hardware makes it easy to adjust installation styles when environments require something unexpected. Strong magnets on top of the interlocking magnesium alloy-framed cabinets are easy to understand, and the cabinets are lightweight, enabling single-person set-up. Magnet-connected 250x250 LED modules are very fast to install and service from the front or the back, and the safety chain safeguards from accidental falls.

Built-in corner protection, ratcheting cabinet locks and anti-collision cabinet design ensure the displays hold up for the long-term, even when they're regularly on the road to the next venue. Plus, when they're in use, modular design offers full front or rear access, making any needed maintenance and servicing a breeze.

Planar VS Series Features and Benefits:

- Fast, secure assembly, teardown and transport
- Available in 2.5, 3.9 and 4.8mm pixel pitches
- Magnetically-attachable with ratcheting quick-lock system for single-person handling
- Hang or stack using the same hardware
- Corner protection, safety chains and anti-collision edges for more confident installation
- Curve video walls +/- 5 degrees with custom degrees available
