

Course Name: Planar TWA Series LED Video Wall Certified Installer Training

Sponsor: Planar

CTS Renewal Units: 4.0 CTS or CTS-I

Course Description:

The Planar® TWA Series LED Video Wall Certified Installer Training Course is an introduction to the Planar TWA Series LED video wall product family and is designed to prepare attendees for installation of the product. The course begins with a brief overview of the product and models available, then moves into the installation process, including site preparation, mounting, module alignment, source routing set-up, software adjustments and commissioning of the video wall. The course also includes tips and tricks for a successful installation of the product. Upon completion of the course, attendees will be Certified Installers of Planar TWA Series LED video walls.

Course Time: 8 Hours

Learning Objectives:

At the end of this program, attendees will be able to:

- 1) Recognize and understand the various models and options available in the Planar TWA Series LED video wall product family and how each affects the installation process.
- 2) Successfully install, adjust and align Planar TWA Series LED displays, signal distribution and cabling to create a custom Planar TWA Series video wall.
- 3) Use TWA Control Software for set-up, display layout, color settings and seam correction.
