

**Course Name:** Planar VVR Series Indoor & Outdoor LED Video Wall Certified Installer Training

**Sponsor:** Planar

**CTS Renewal Units:** 4.0 CTS or CTS-I

**Course Description:**

The Planar® VVR Series Indoor & Outdoor LED Video Wall Certified Installer Training Course is an introduction to the Planar VVR Series Indoor & Outdoor LED Video Wall product family and is designed to prepare attendees for installation of the product. The course begins with a brief overview of the product and models available, then moves into the installation process, including site preparation, mounting, display installation and alignment, source routing set-up, software adjustments and commissioning of the video wall or display array. The course also includes tips and tricks for a successful installation of the product. Upon completion of the course, attendees will be Certified Installers of Planar VVR Series LED displays.

**Course Time:** 8 Hours

**Learning Objectives:**

At the end of this program, attendees will be able to:

- 1) Recognize and understand the various models and options available in Planar VVR Series and how each affects the installation process.
- 2) Successfully install, adjust and align Planar VVR LED Displays, signal distribution and cabling, to create a custom Planar VVR LED Display video wall.
- 3) Use the Planar VVR Series Controller and Control Software for set-up, display layout, color settings and seam correction.
