

Course Name: Principles of Video Wall Display Technology

Sponsor: Planar

CTS Renewal Units: 0.5 CTS or CTS-D

Course Description:

The Principles of Video Wall Display Technology Course introduces video wall technology and offers key considerations for specifying a video wall. The course reviews the origins of video walls and various modular video display technologies. It outlines technical specifications and offers questions to ask before choosing a video wall solution. The course then profiles video wall applications and case studies concluding with a summary of industry trends and considerations for assembling a complete solution.

Course Time: 1 Hour

Learning Objectives:

At the end of this course, attendees will be able to:

1. Describe the component functions of a video wall system
2. Understand key design considerations for video walls
3. Identify technical specifications and aspects of a successful video wall installation
