

Course Name: Planar MGP Series LED Video Wall Certified Installer Training

Sponsor: Planar

CTS Renewal Units: 4.0 CTS or CTS-I

Course Description:

The Planar® MGP Series LED Video Wall Certified Installer Training Course is an introduction to the Planar MGP Series LED Video Wall product family and is designed to prepare attendees for installation of the product. The Course begins with a brief overview of the product and models available, then moves into the installation process including site preparation, mounting, cabinet installation and alignment, power and source routing set-up, software adjustments and commissioning of the video wall. The Course also includes tips and tricks for a successful installation of the product. Upon completion of the course, attendees will be Certified Installers of Planar MGP Series LED video walls.

Course Time: 8.0 Hours

Learning Objectives:

At the end of this program, attendees will be able to:

1. Recognize and understand the various models and options available in the Planar MGP Series LED Video Wall product family and how each affects the installation process.
2. Successfully install, adjust and align the Planar MGP LED cabinets, power and signal distribution, to create a custom Planar MGP video wall.
3. Use of Planar ColorLight iSet Control Software for set-up, video wall layout, color settings and seam correction.
