

**Course Name:** Planar DirectLight Ultra LED Video Wall System Certified Technical Training

**Sponsor:** Planar

**CTS Renewal Units:** 4.0 CTS or 4.0 CTS-I

**Course Description:**

The Planar® DirectLight® Ultra LED Video Wall System Certified Technical Training Course is an introduction to the Planar DirectLight Ultra LED Video Wall System product family and is designed to provide attendees with the technical information for the product. The course begins with a brief overview of the product and models available, then moves into the installation process, including site preparation, mounting, module alignment, source routing set-up, and Planar WallDirector software.

**Course Time:** 8.0 Hours

**Learning Objectives:**

At the end of this program, attendees will be able to:

1. Recognize and understand the various models and options available in the Planar DirectLight Ultra LED Video Wall System product family and how each affects the installation process.
2. Understand installation, adjustment, and alignment of the Planar DirectLight Ultra LED cabinets, signal distribution and cabling, and the Planar RPS and VC Rack Components.
3. Learn the Planar Wall Director Software to create the desired images and configurations. Includes an Introduction to the Planar TSX Control Software for set-up, cabinet layout, color settings and seam correction.
